

From Scattered Files to One Clear Story

Ten disconnected CSVs became **one automated platform** — turning Olist's raw e-commerce data into decisions leaders act on in seconds, not weeks.

THE PROBLEM

- Data scattered across 10 CSV files
- No single view of revenue, customers or logistics
- Leaders deciding on gut feel

THE SOLUTION

- One pipeline: ingest → warehouse → transform → serve
- 7 marts · 81 quality checks · live dashboard
- Refreshes daily — zero manual effort

THE IMPACT

- R\$15.8M GMV & 8× growth made visible
- R\$2–5M opportunity quantified
- Answers in seconds, not days

The Business at a Glance

A fast-growing marketplace with **solid satisfaction** — covering 2016–2018 across the full Olist dataset.

An Honest Look at the Limits

Every risk is known, mitigated, or scoped to Phase 2 — nothing blocks going live today.

❏ Data stops at Oct 2018

MITIGATION Connector-agnostic pipeline; live data plugs in within a day.

❏ Query cost at scale

MITIGATION Incremental models + partitioning already cut cost ~70%.

❏ Single data source

MITIGATION Gaps documented; external sources scoped for Phase 2.

❏ Root cause of churn unknown

MITIGATION Add CRM + browsing data — a 6-week Phase 2 add-on.
